THE
AMERICAN
MEDICAL RECORDER,
OF
ORIGINAL PAPERS AND INTELLIGENCE
IN
MEDICINE AND SURGERY.

CONDUCTED BY
JOHN EBERLE, M. D. Philadelphia.
HENRY WILLIAM DUCACHET, M. D. New-York.

Nullius addictus jurare in verba magistri.—HOR.

VOL. V.

PHILADELPHIA:

PUBLISHED BY JAMES WEBSTER, NO. 24 SOUTH EIGHTH STREET; ALSO BY T. & J.
SWORDS, NEW-YORK; AND JAMES WEBSTER, NO. 11, SHARP STREET,
BALTIMORE.

J. Harding, Printer.

1822.

Eastern District of Pennsylvania, to wit :

BE IT REMEMBERED, That on the eighth day of January, in the forty sixth year of the Independence of the United States of America, A. D. 1822, James Webster, of the said District, hath deposited in this office the title of a book, the right whereof he claims as proprietor, in the words following, to wit :

“ The American Medical Recorder, of Original Papers and Intelligence
“ in Medicine and Surgery. Conducted by John Eberle, M. D. Philadelphia. Henry William Ducachet, M. D. New-York. Nullius
“ addictus jurare in verba magistri.—HOR. Vol. V.”

In conformity to the act of the Congress of the United States, intituled,
“ An act for the encouragement of learning, by securing the copies of maps, charts, and books, to the authors and proprietors of such copies, during the times therein mentioned.” And also to the act, entitled “ An act supplementary to an act, entitled “ An act for the encouragement of learning, by securing the copies of maps, charts, and books, to the authors and proprietors of such copies, during the times therein mentioned,” and extending the benefits thereof to the arts of designing, engraving, and etching historical and other prints.”

D. CALDWELL,
Clerk of the Eastern District of Pennsylvania.

PROSPECTUS.

THE AMERICAN MEDICAL RECORDER.

OF
ORIGINAL PAPERS AND INTELLIGENCE IN MEDICINE
AND SURGERY.

Conducted by

JOHN EBERLE, M. D. Philadelphia.

HENRY WILLIAM DUCACHET, M. D. New-York.

Nullius addictus jurare in verba magistri.—HOR.

A new arrangement having been adopted in the editorial department of the American Medical Recorder, the Editors beg leave to exhibit to the Subscribers and the Medical public generally, the plan which they propose to follow in conducting that work in future.

The Journal will be divided into three parts, viz.

I. Original Communications.

II. Reviews.

III. Medical and Philosophical Intelligence.

The first division will be appropriated to communications on Medicine, and the collateral branches of Science; and, as it is intended to confine the work principally to subjects of practical importance, this department will always embrace a number of interesting and useful cases.

The second division will contain Critical and Analytical Reviews. The Critical Reviews will, as far as possible, be confined to American publications; they will be written in the spirit of liberality, but at the same time, with the most perfect independence.

The Analytical Reviews will contain the spirit and substance of foreign works; presenting, in a condensed form, the most valuable facts, and the particular doctrines which they set forth.—And as the publisher has made arrangements to obtain all the most respectable Journals from England, France, Italy and Germany, and to receive every new work in Medicine and Surgery immediately after its publication, the Editors hope to make this department of the Journal particularly useful and interesting.

The third department will embrace insulated medical facts, biographical notices of distinguished physicians, meteorological tables, and a variety of medical and philosophical intelligence.

Communications for the American Medical Recorder may be transmitted to Dr. DUCACHET, of New-York; or to the Publisher, JAMES WEBSTER, Philadelphia.

N. B. Our Correspondents are requested to send their communications one month, at least, before the period for publishing the number for which they are intended. The months for publication are January, April, July, and October.

CONDITIONS.

The American Medical Recorder is printed on fine paper, with a good type, and will be delivered to subscribers, in quarterly numbers, each containing upwards of 150 pages, with occasional engravings, illustrating interesting subjects, making one volume in a year.

The price to subscribers is five dollars annually.

No subscription will be received for less than a year. Gentlemen wishing to discontinue their subscriptions, must give notice to the publisher, at least, three months before the close of the year, for which they subscribed, and pay up all arrearages.

Philadelphia, January, 1822.
